

Adobe Premiere Pro CC2015.2 Ver,9.2.0(41)Build

4K Clip Import Guide

Note: Intra4K-LT, Intra2K-LT and Intra-LT format are not supported.

* You can convert these format to DPX files on the latest version P2 Viewer Plus to import video on Premiere Pro CC.
Please refer to the next page.

The screenshot shows the Adobe Premiere Pro interface with the Media Browser and Project panels. The Media Browser is set to 'Main' and shows a file tree with folders like '4K-4096x2160-Spanned' and '23.98p-Intra-422-Spanned'. A file named 'A008_C007_0409' is selected. The Project panel shows a clip named '097Q50YU' with video info '3840 x 2160 (1.0) 23.976 fps'. A context menu is open over the clip, showing 'Automatic recognition by Panasonic P2' and 'File Directory' with 'Panasonic P2' selected. Annotations include: 1. 'P2 card direct import: Please click the target P2 card device so that you can directly confirm clips.' 2. 'Import from a hard disk drive: Please select the parent folder of CONTENTS folder of P2.' 3. 'Drag and drop the necessary clips into a project bin.'

Media Browser tab

Media Browser

1 P2 card direct import: Please click the target P2 card device so that you can directly confirm clips.

2

1 Import from a hard disk drive: Please select the parent folder of CONTENTS folder of P2.

Drag and drop the necessary clips into a project bin.

Automatic recognition by Panasonic P2

File Directory

Panasonic P2

Name	Video Info	Frame Rate	Me
097Q50YU	3840 x 2160 (1.0)	23.976 fps	

DPX conversion on P2Viewer Plus

Conversion from Intra4K-LT, Intra2K-LT and Intra-LT to DPX on P2 Viewer Plus is necessary to import on Premiere Pro CC.

1 Select a clip to convert to DPX

2 When IN/OUT points are set, please select this.

3 When IN/OUT points are not set at step [2], or batch conversion is necessary, please select this.

4 Specify the output destination of the path.

5 Start

IN point

OUT point

If IN/OUT points are set, please click [DPX Conversion] at step [3].

If you set the IN/OUT points, timecode is displayed on Memo list tab.

note After conversion, the following folder structure is created at the specified path. For example: DPX files are created in [A003_...] folder. Please select all the created DPX files to import on Premiere Pro CC. (Note that audio is not converted.)

Clip Name	IN point	OUT point	Status	Result
A001C001_160411...	00:59:00:00	00:59:04:23	TYPE3
